

Crossroads Partner

Consult + Deliver + Guarantee

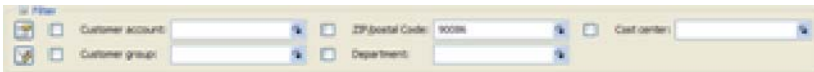

Cross4™ for Microsoft Dynamics™ AX uses advanced tools to make advance AX Setup more accessible to Consultants and IT Departments and improves Developer Productivity.

Main features of Cross4™

- **Filter bar** on top of Forms
- **Document folder view** from any screen
- **Form plugins** to change Functionality
- **Message queue** for Integration per module or Form
- **CrossTools** for miscellaneous power/development tools

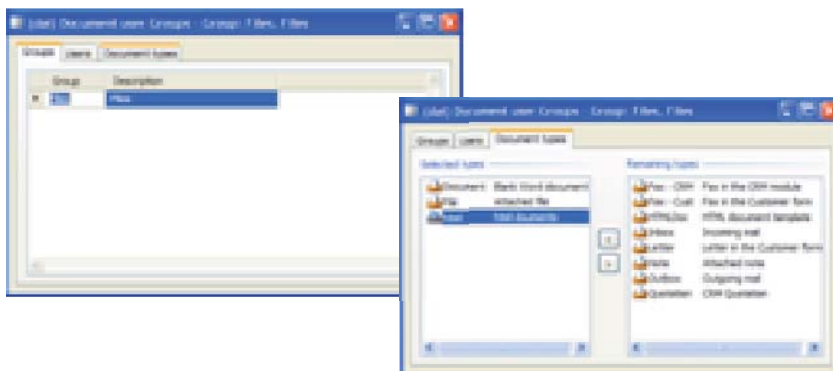

Filter Bar

- A component that handles a visible record filter on forms
- User setup is saved
- Add/remove filter fields on runtime
- Available on all forms

Extended Document Handling

- Document groups
- Document user groups
 - To restrict access to documents in the document handling system

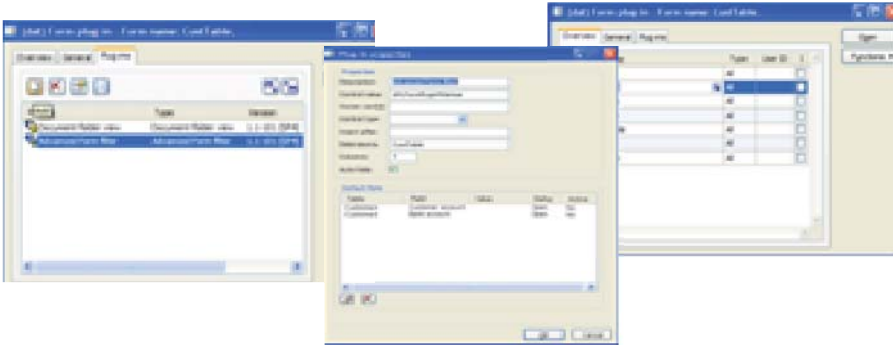

Key Benefits:

- Consultant & IT Department Friendly Tools: Enhance Microsoft Dynamics AX without Developers via Drag and Drop
- ANYONE can add Form Filters, Document Explorer Windows & Module Messages Using Plugins (Setting Parameters in the database) without Programming.
- Developers Productivity improves 50% using Advanced set of Programming Tools for Developers
- Minimal Footprint in Microsoft Dynamics AX, Small Layer, Runtime Generation of Screens = Easily Introduced into Existing Microsoft Dynamics AX 3.0 and 4.0

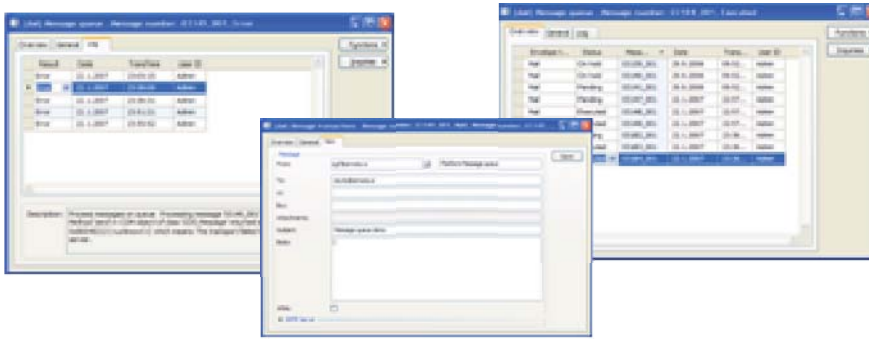

Form Plugins

- Plugins are setup for each form
- No limit for how many can be added
 - Each plugin has its properties

Message queue

- Internal message processing framework
- Used i.e. to process emails from the system
- Messages can be edited on queue and put back
- Transaction log for each message

CrossTools for Developers

- Business connector restart component
- Compare records from the standard record info form
- Copy/paste application object to clipboard
- Compare project component
- Form tree levels
- Dynamic tree data based on single setup
